## **Introduction**

GOVERNMENT COLLEGE OF ENGINEERING, KEONJHAR stands in pride and honour imparting the true colours of learning and wisdom. Having its footsteps in one of the oldest Technical Institute, the Orissa School of Mining Engineering, Keonjhar (OSME), it is the only Government College providing Engineering and Technical education in North Odisha. In the year 2006, the Government of Odisha declared it as a constituent college of Biju Patnaik University of Technology, Odisha under self-sustaining mode to develop it as a centre of excellence in the field of Engineering & Technology. It was declared as a full- fledged Government Engineering College in the Year 2011 observing its rising excellence and potentiality in growth. Presently the institute offers under graduate courses in seven disciplines i.e. Mining Engineering, Mechanical Engineering, Electrical Engineering, Metallurgical & Materials Engineering, Mineral Engineering, Civil Engineering and Computer Science & Engineering.

As Government College of Engineering, Keonjhar is in the midst of the Mining and Mineral based industry of Odisha, it has been decided to set up a Centre of Excellence in the area of Mining & Allied Industries here. Today in this disruptive world, technology is deep rooted in everything that we do. The pace at which technology is evolving is extremely fast. For example what in yesteryears technology used to evolve in a decade is now see to evolve in less than a year. Keeping that in the mind our institute will be the Centre of Excellence and will also enable the nearby Polytechnics and ITIs to quickly adopt to Mining 4.0 framework so that our Skilled-in-Odisha professionals are made Ready-to-Deploy in the industry. Keeping this in the mind, GCEKJR is taking this initiative to enable Industry, Institutes, Students & Society to work around the conventional way of Learning and adopting Technology in order to face the Digital Disruption to deliver value across the stakeholders. One of the areas under Digital Skilling is Digital Twin for Mining (DTM) with 3DEXPERIENCE, which has a high demand in many industries and organizations. It is observed that Digital Twin For Mining (DTM) on 3DEXPERIENCE Platform is a subject that is part of course curriculum in branches like Mining Engineering, Mineral Engineering, Metallurgical & Materials Engineering, Mechanical Engineering, Industrial Engineering etc. at the institutes. The proposed Centre of Excellence will establish a close link with the local industries and encourage the faculty members to take up research and consulting work in coordination with these industries.

## Inviting Proposals

Considering the niche and high value nature of Digital Twin for Mining (DTM) on 3DEXPERIENCE Platform skills, GCEKJR intends to establish a Centre of Excellence and engage with OEM / reputed Partners/Agency and invites Expression of Interest in imparting the PELM courses leveraging 3DEXPERIENCE Platform for various students, faculty members, research scholars in Engineering and Diploma Colleges. This program will be implemented by GCEKJR and OEM / reputed partners through joint collaboration as per terms of engagement mutually agreeable to both sides.
