advanced pattern-matching search and filtering algorithms and compare the uploaded work with an unparalleled content database.

- n) The iThenticate content database includes:
- 47,000 journals and over 69 million articles and documents directly from top publishers
  - 91 billion current and archived web pages
  - 93% of the top 10,000 journals are included in our database
  - 135 million open access content pieces through our partnership with CORE
  - 200,000 US Law Reviews
  - 800,000 ProQuest Dissertations & Theses
  - 170 million published works including books, pre-prints, conference proceedings, journal articles and more
- o) Embedded in the Publisher's Process
- p) Only iThenticate is incorporated into top publisher's workflow and process. Through our exclusive partnership with Crossref, 1,500 publishers license iThenticate and rely on it to check for plagiarism when screening and reviewing article submissions. Institutions and researchers can feel much more confident about their submission and acceptance chances, knowing that by using iThenticate they have the same data and information as the publisher.
- q) Flexible Settings, Collaboration, and Management
- r) iThenticate has a wide variety of settings that help researchers refine their results to evaluate the most critical matches, collaborate with their peers and co-authors, and generate reports that are easy to evaluate and share.
