Naandi Foundation
(Mahindra and Mahindra)

About Mahindra Pride Classroom:

Since 2016, Mahindra Pride Classroom (MPC) has been dedicated to empowering final-year students from Government Engineering Colleges, Polytechnics, Arts & Science institutions, and ITIs across 20 states in India. The program delivers a well-structured training module of 40 to 120 hours, designed to enhance employability and prepare students for industry demands.

To date, MPC has trained over 5,60,886 youth, equipping them with future-ready skills and the adaptability needed in a constantly evolving job market. Many participants have also secured jobs through Job Utsav placement events, connecting them with reputed employers nationwide.

Funded entirely by the Mahindra Group as part of its Corporate Social Responsibility (CSR) initiative, the program comes at no cost to students.

MPC's hybrid training model blends proven skill-building approaches with the power of technology. Sessions are delivered by highly skilled adjunct faculty, focusing on developing 21st-century competencies such as communication, problem-solving, and workplace readiness.

This initiative is more than training—it is a gateway for youth to step confidently into their careers, contributing to India's growth story.

About Naandi Foundation:

Naandi Foundation, established in 1998, is a non-profit organization dedicated to eradicating poverty and improving quality of life in India. It focuses on areas like child education, safe drinking water, sustainable livelihoods, and social equity. Through innovative programs, partnerships, and community-driven approaches, Naandi empowers marginalized communities, especially women and children. Its mission is to create lasting change by combining grassroots action with scalable solutions, fostering self-reliance and inclusive development across rural and urban India.

About Us:

Government College of Engineering, Keonjhar, Odisha, established in 1995, is a leading institution for engineering education. Initially offering Mining Engineering, it later expanded to include Electrical, Mechanical, Mineral, and Metallurgical Engineering. In 2015, Computer Science and Engineering, along with Civil Engineering, were introduced.

Renowned for its academic excellence and industry collaborations, it is the only government college in Odisha offering a B.Tech in Mining and Mineral Engineering, shaping skilled engineers for a progressive future.
